RoweBots FTP downloading guide
(ftp://ftp.rowebots.com/)

There are several methods, which you can use to download the content from our FTP-server. Among them it is: downloading by internet browser, by specific FTP-client or by integrated FTP-client in other applications.

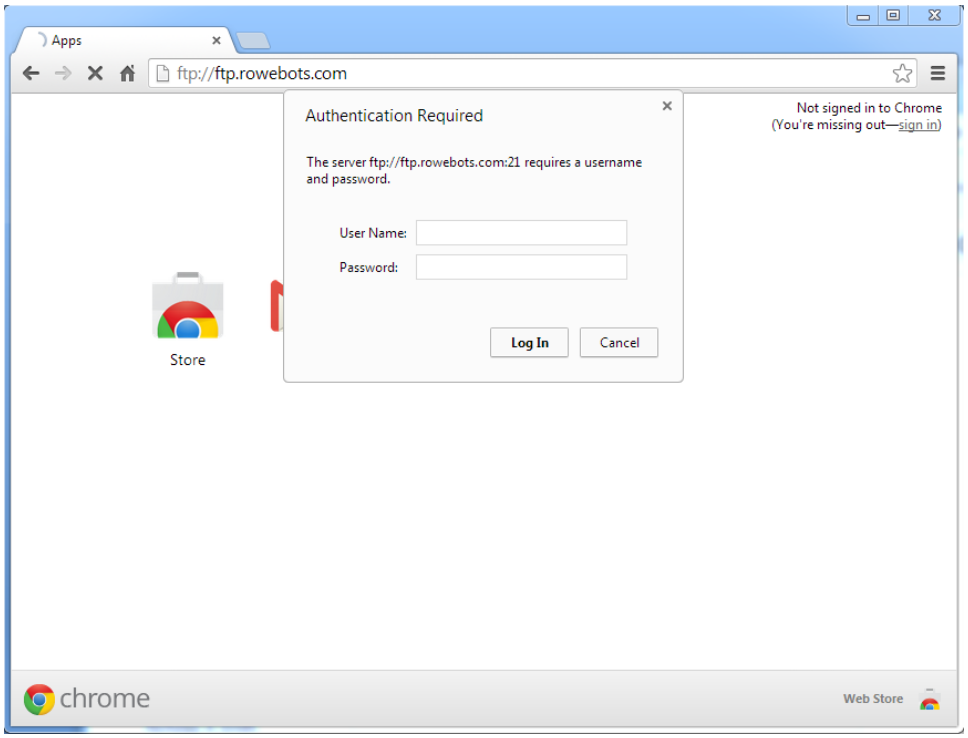
We will describe some popular of that methods.

1. Downloading by using usual internet browser.

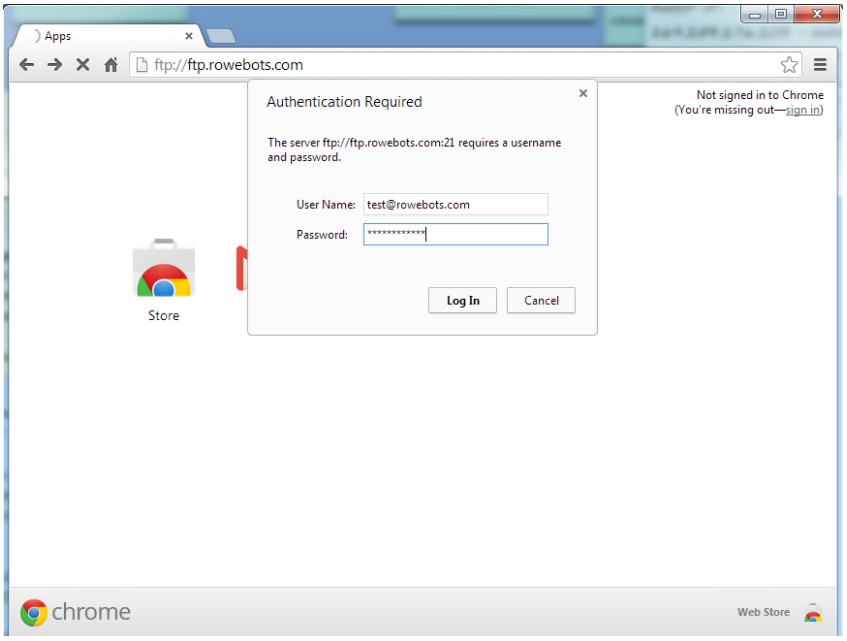
This case assumes that you have any web-browser that supports connection to the FTP-server in general.

For example, we took the Google Chrome.

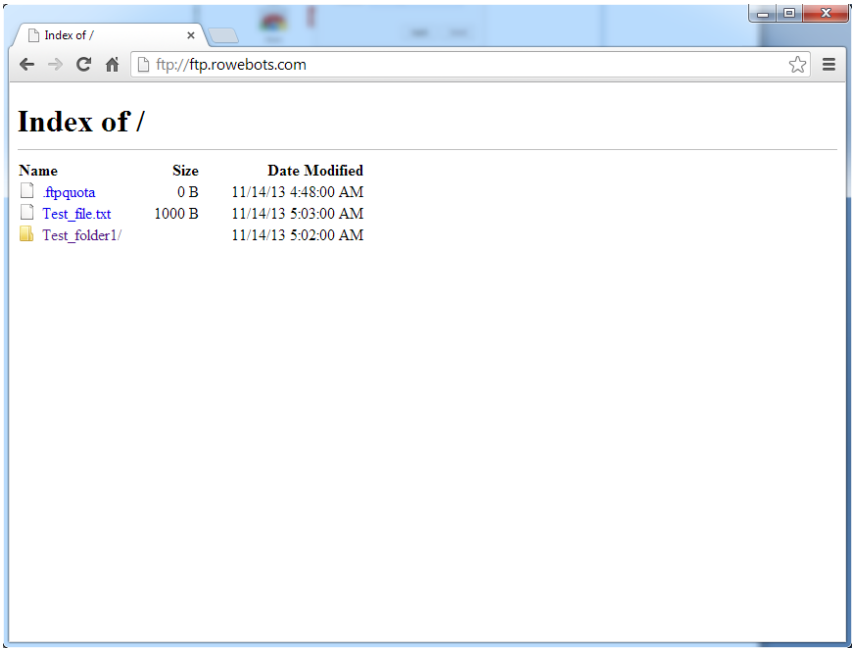
1) Open browser.
2) Type "ftp://ftp.rowebots.com/" in address string and press <Enter>.



3) You will be prompted to enter login and password. Enter the data provided by us and press "**Log In**" button.



4) Now you are connected to our FTP. You can explore directories and files and download necessary by clicking on it. After the click on file link the download dialog will shown.

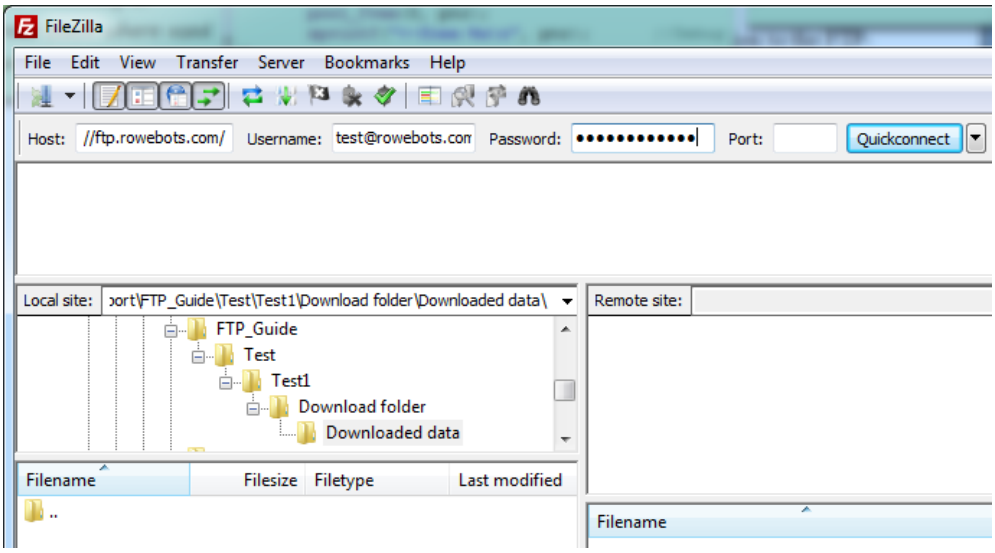


2. Downloading by using specific FTP-client.

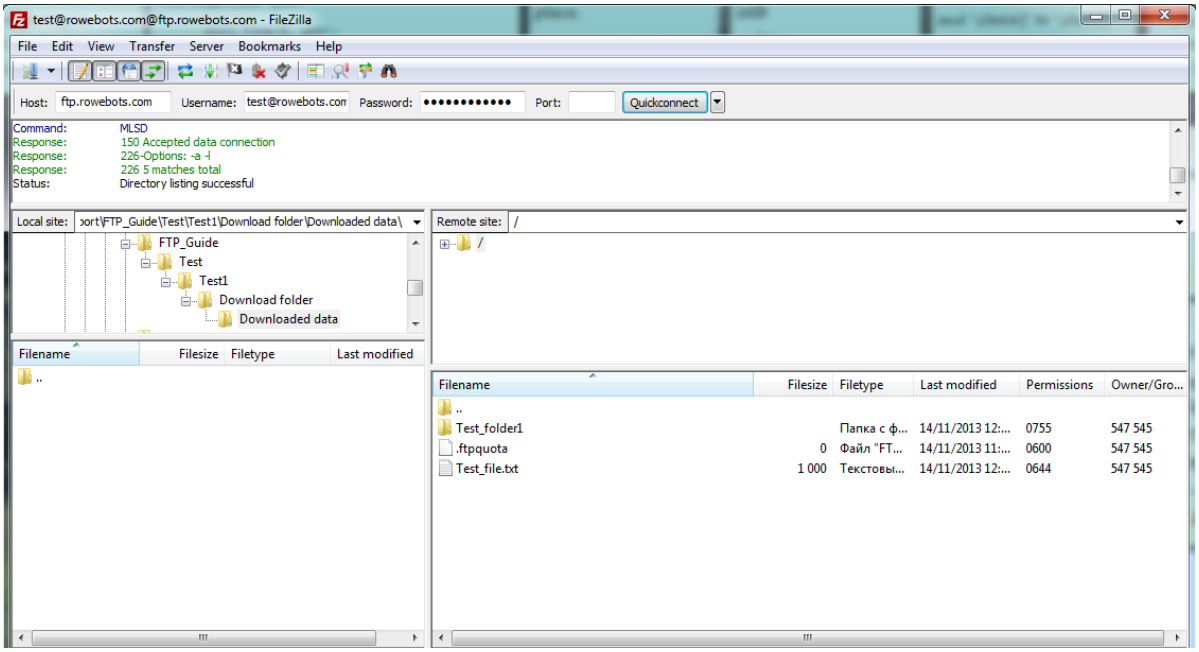
For example we took the FileZilla FTP-client which is freeware.

1) Open FileZilla client.
2) Enter FTP data provided by us into the “Quick connect” panel:
   Host: ftp://ftp.rowebots.com/
   Username: <which has been provided for you>

Password: <which has been provided for you>



3) Press "**Quickconnect**" button. In case that you entered correct data, you will be connected to our FTP-server.



4) Explore directories and files and download necessary using right mouse click on it and context menu item "**Download**".
